Installation Instructions for Sybase Central

The Installation program displays only the products that appropriate for the platform on which the installation program is running

1. Insert the PC-Client CD for ASE 12.5.2 into the CD-ROM. The Studio Installer should start automatically.

   Alternatively, you can start the Studio Installer from the windows Start Menu, Select Start | Run, and enter:

   X:\setup.exe
   Where X is your CD-ROM Drive.
2. Click on the Install PC-Client Components 12.5.2
3. When the license Agreement window is displayed from the drop-down list:

   - Select **United States of America** from the location drop-down list
   - Read the license terms and click "**I agree**…" to continue
   - **Click Next**

4. Select the type of installation to be performed
   - **Full Install**

5. Click **Next**.

   Components to be installed are displayed

6. Click **Next.**

7. If the target directory does not exist, Studio Installer prompts: "OK to create directory?" **Click Yes**.

8. The Installer Window – Installation Completed is displayed

   The message "Installation was successful" is displayed

   Click finish to end installation

9. When prompted to restart the computer, leave the CD in the CD-ROM drive and **select yes**. Restarting the PC updates the environment variables and registry keys.
